Chapter 311: The Divine Awakening

With the vast expansion of Sung Jin-Woo's influence across the realms, something profound began to occur. It was not just the worlds that were changing, but every being under his dominion. His divinity, having permeated the multiverse, began to work its way into the very essence of those who followed him—his subjects.

The Awakening of the Followers

His worshippers, followers, and priests, who had always been devoted to him, began to experience an extraordinary transformation. As they prayed and praised him, the divine energy that Sung Jin-Woo exuded reached deep into their souls, awakening latent potentials they never knew existed.

Physical Changes: Their bodies began to harness divine power—their muscles became more defined, their speed and reflexes increased, and their senses sharpened beyond the human scope.

Spiritual Awakening: Their hearts grew in resilience, their minds in clarity, and their souls in strength. They became more in tune with the divinity that flowed through their veins.

As a result, their power soared. Where once they were mere mortals, they now stood on the brink of becoming divine themselves. The simple act of worshipping Sung Jin-Woo had linked them to the divine energy that pulsed through the multiverse, and now they were stronger, more powerful, and more attuned to the forces that governed the universe.

The Rise of the Divine Armies

The effects of Sung Jin-Woo's divinity did not stop with his followers. His Apostles of God, Dark Apostles, and the legions of Heavenly Soldiers, Dragonkins, Shadowkins, and more, began to experience incredible power-ups. The very energy Sung Jin-Woo had cultivated in his realms began to be absorbed by his troops, causing them to grow far beyond what they had been before.

1. Apostles of God: Once noble and strong angelic beings, the Apostles found themselves ascending to new heights. Their wings, once radiant and powerful, now gleamed with the divine light of Sung Jin-Woo. They gained divine abilities that were once impossible for them to wield—creating barriers of light, healing wounds, and even manipulating time on a small scale.

2. Dark Apostles: Even the Dark Apostles, beings born from primordial darkness, experienced this divine awakening. Their black wings, once symbols of their origin, now pulsed with a strange mixture of light and shadow, allowing them to control both elements. Their dark magic became far more potent, and they could even resurrect fallen comrades and corrupt the essence of their enemies.

3. Heavenly Soldiers: These beings, born from the World Tree, found themselves becoming more than simple soldiers. Their connection to the divine energy of Sung Jin-Woo made them stronger and more capable of manipulating divine light. Their wings grew larger, and their spirits began to possess the power to manipulate the elements themselves—earth, wind, fire, and water—making them far more versatile and powerful in battle.

4. Dragonkins: The Dragonkins, once creatures of immense power, felt the awakening of true divine strength within them. Their scales became indestructible, their breath became capable of melting entire cities, and their bodies became more massive and immortal. Even their internal hearts began to burn with an intensity that matched the stars themselves.

5. Shadowkins and Shadow Lords: The Shadowkins—high humans, high elves, and high dwarves born of lesser fruits of the World Tree—found themselves imbued with pure divine shadow. They could now manipulate shadows to create entire realms, trap souls, or even phase between dimensions. Their strength and abilities skyrocketed, allowing them to become formidable beings capable of facing threats far beyond their former limits. Even the Shadow Lords, who controlled vast armies of shadow soldiers, grew exponentially more powerful as their control over shadows and darkness became unchallenged.

6. Fiery Dragon Lords and Materialized Shadow Soldiers: The Fiery Dragon Lords, imbued with dragon energy, and the Materialized Shadow Soldiers, crafted from the very essence of Sung Jin-Woo’s dominion, were granted unimaginable power. Their attacks became more destructive and their endurance, near infinite. They could fight against entire legions without tiring and could reshape entire landscapes with a mere thought. The once-limited warriors had evolved into beings of absolute devastation.

Divinity Spreads Across Realms

As Sung Jin-Woo's divinity continued to spread throughout the multiverse, the effects were felt not only by his followers but by all life in the realms he had touched. Divine energy became a natural part of the environment, infusing every corner of existence with the potential to grow and evolve. His armies no longer acted simply as soldiers, but as divine beings—each one of them a small reflection of Sung Jin-Woo’s power.

The more he expanded his reach, the more his essence merged with the multiverse, causing nature itself to evolve. The worlds became stronger. The very laws of existence began to shift, bending to the will of his divinity. Reality itself started to transform, with new possibilities opening up.

The Divine Order Emerges

With this awakening of power, Sung Jin-Woo’s followers and legions began to form a new divine order—one not ruled by a single god, but by an army of beings who were now part of the divine network Sung Jin-Woo had created. His vision of an entire multiverse rising together as equals, each capable of wielding divine power, was no longer a distant dream but an inevitable reality.

The divine armies now acted as guardians of the realms—ensuring that no being, no matter how great or small, would ever have to face a threat alone. The ultimate challenge now was to unite all of them under one banner, one singular goal: to protect the multiverse and ascend to even greater heights.

But the true test was yet to come: the challenge of facing the outer multiverse entities, those ancient and primal beings who lived outside the very fabric of existence, awaiting the time to consume it all. Sung Jin-Woo’s creation had only just begun.

The divine awakening was only the beginning of something far greater.
